Detailed Action

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to the independent claims 1 and 8, prior art fails to disclose or make obvious a system and method for exhibiting Cherenkov radiation comprising: a beam of traveling charged particles; and a photonic crystal structure that receives said beam of charged particles, said charged particles move in said photonic crystal structure so that Cherenkov radiation is produced at all velocities without requiring resonances in the effective material constants of said photonic crystal structure.

The dependent claims 2-6 and 15-17; and 9-14 and 18-20, are allowable by virtue of their dependence upon the independent claims 1 and 8, respectively.

Conclusion

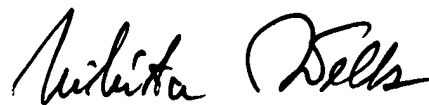

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Z. Dimcovski (6,552,347 B1) discloses the generation of Cherenkov radiation by the passing of charged particles through a material, but fails to disclose that this material has a photonic crystal structure. Prather et al. (2003/0016915 A1) disclose the use and manufacture of a photonic crystal structure, but fail to disclose the generation of Cherenkov radiation in the photonic crystal structure.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
